Features

· Videos sending management
· Support 120 STB
· Convert to DVD or other formats
· Videos storing
· Search video via timeline or phrase
· Empty the videos after watching
· Auto recycling
· Attach exam and answer files

120 STB Support 120 STB

Allowing more students to view the lectures, FL supports 120 STB and pushes the lectures to assigned STB simultaneously.

Higher Capacity

Compared with SES, FL is designed to store more videos than SES. You can save more videos with FL!

Hard Disc Encryption

FL protects your videos via hard disc encryption. Even the hard disc is stolen or connects to another computer, others can't view the videos.

Lectures Collection

After using a period of time, FL will delete the oldest videos to release the space for new videos. To store the precious videos permanently, we design the collecting function. This can lock the videos and you won't worry about losing!

Advanced Lectures Pushing

Like SES, FL also can push the lectures to assigned STB. However, we give FL a new function which can appoint several lectures with different STB.

Importing Videos

FL also can store the DVD and VCD videos. Just import DVD or VCD to FL directly, FL can make lecture-pushing easy.
